

Alon Gal

TECHNICAL PM · GENAI · SOFTWARE ENGINEER · LEARNING DESIGNER

Technical product manager and software engineer building GenAI-powered products. Combines product thinking with hands-on engineering. Creative, people-driven and loves education ♥

EXPERIENCE

Masterschool

Online tech education & degree programs

2022 – Present

Technical Product Manager

2026 – Present

- Leading academic content operations and the academic feature roadmap for two accredited AAS degrees at a US college (Software Engineering & AI, Business) with ~8k active students
- Designed and built an AI-powered LMS that faculty use to create, maintain and improve course materials
- Shipped features from prototype to production with AI-assisted development
- Investigated errors with observability tools, and ran evals and A/B tests to guide fixes, model choices and prompts

Software Engineering School Lead

2023 – 2026

- Led a Germany-based software engineering school of ~700 students, owning curriculum and academic standards
- Led educational processes, including evaluations and mastery-learning assessments
- Managed 30+ staff and provided pedagogical guidance to Zoom instructors, 1:1 tutors, mock interviewers and project mentors

Software Engineering Instructor & Course Designer

2022 – 2023

- Designed curriculum, content and assessments grounded in learning theories

Magshimim

Nationwide cyber education program for teenagers

2010 – 2022

Education Content Creator & Course Manager

- Led development and management of the “Network Fundamentals” training program for ~500 students a year
- Built and ran Cyber Security CTF challenges (Web-Sec) for hundreds of students at a time

High Schools

Geula (Tel-Aviv), Beer-Sheva, Holon

2012 – 2022

Computer Science & Home-Room Teacher

- Computer Science (Java), Computer Networks and Cyber (Python) for Bagrut
- Home-room teacher for second-chance youth and deaf students; led social skills groups

IDF

Unit 8200

2004 – 2008

Software Engineer

- Completed the “Mamas” software course
- 4-year service as a software engineer in a technology unit
- Instructor and commander in “Aram” course
